

Compare Autodiagnos™ TPMS Tools

Optimize your TPMS investment

For multiple-bay shops consider at least one D TPMS Tool plus as many SE TPMS Tools as your workload requires. Both tools' flow supports individual repair facility's service repair process, and both support TPMS and tire service features from the main screen that do not require vehicle specific configurations.

Compare Autodiagnos™ TPMS Tools

SE vs D

	TPMS SE	TPMS D
Trigger / Relearn functionality		
Triggers OE sensors for all cars; Domestic, European, Asian	●	●
TPMS relearn coverage for over 95% of domestic, Asian and European passenger vehicles	●	●
Provides TPMS ECU relearn procedures including indirect / direct / manual	●	●
OBID-II relearns in under 2 minutes - transfer IDs via OBID-II to eliminate manual relearn steps (available for most domestic and European vehicles)	●	●
Unlock ECU for Toyota, Lexus, Scion	●	●
Sync- ID technology (OBID-II routines for Ford, Mitsubishi, Suzuki, and others)	●	●
Sensor programming functionality		
Sensor programming coverage	Limited to EZ-Sensor® No upgrade possible	EZ-Sensor® and 19 other aftermarket sensor brands
Program / Clone sensors by: OBID; retrieve IDs; TPMS ID input; wheel set (up to 5 wheels)	●	●
Retrieves ID from ECU	●	●
Manual ID entry function	●	●
Programs sensors from historical data	●	●

The Autodiagnos™ SE TPMS Tool

is a great choice if you have multiple bays. The SE Tool provides fast, easy-to-use TPMS service and coverage for the all passenger vehicle OE sensors and the most popular aftermarket sensors.
